

Amendments to the Specification:

Please amend the specification as follows:

Please replace paragraph starting at page 1, line 5, with the following rewritten paragraph:

The invention relates to a nozzle array, especially for a motor vehicle, ~~according to the preamble to claim 1.~~

Please delete the paragraph starting at page 2, line 1.

Please replace paragraph starting at page 4, line 19, with the following rewritten paragraph:

The outer part flow duct 5 serves, in particular, to supply air in a comfort setting (diffuse flow) to the nozzle array ~~[[1]] 4~~ and is rigidly configured, while the inner part flow duct 6 serves to supply the air in a spot setting (directed flow) of the nozzle array ~~[[1]] 4~~. Selective mixed settings are possible. The air current supplied through the flow duct is apportioned to the two part flow ducts 5 and 6 by means of a metering device (not represented in greater detail).
